JOB TITLE

Junior Full-Stack Developer

Aspiring software engineer with hands-on experience in full-stack development using React, JavaScript, Python, and SQL. Passionate about building efficient, user-friendly web applications and constantly learning new technologies.

PROJECTS

HTML Table

A React application designed to help users build and customize HTML tables with ease. This project leverages JavaScript for its functionality and CSS for styling, providing an intuitive interface for creating and managing tables within a web environment. Ideal for developers looking to quickly generate HTML tables without writing extensive HTML code.

COVID-Admin

This project utilizes a combination of HTML, Python, and SQL to provide a robust and efficient platform for managing COVID-related data. The frontend is built with HTML, contributing to 50.5% of the project, while Python, which constitutes 49.5% of the project, is used for the backend logic and data processing. SQL is employed for database management, ensuring efficient data storage and retrieval. The application aims to facilitate the administrative tasks related to tracking and managing COVID data effectively.
