Projects

COVID-Admin Platform

Full-Stack Developer | 2023

- Developed a web application to manage COVID-related data using HTML, Python, and SQL

- Built a responsive frontend with HTML/CSS and implemented backend logic using Python

- Designed and optimized SQL database schemas for efficient data storage and retrieval

- Impact: Streamlined administrative processes for tracking and reporting COVID data

HTML Table Generator

Front-End Developer | 2023

- Created a React-based application enabling users to build and customize HTML tables dynamically

- Implemented interactive features using JavaScript and styled the interface for responsiveness and usability

- Impact: Reduced manual HTML coding time by providing an intuitive interface for developers
